

Roberson and Associates, LLC

Roberson and Associates is a technology and management consulting company serving government and commercial customers. It provides services in the areas of terrestrial wireless and space-based systems, RF spectrum management, RF measurements and analysis, strategy development, and technology management. The organization was founded in 2008 by Dennis Roberson, formerly Executive Vice President and Chief Technology Officer at Motorola and Vice Provost and Research Professor, Illinois Institute of Technology. Mr. Roberson currently chairs the Technological Advisory Council at the Federal Communications Commission. The firm is comprised of a highly expert group of senior individuals with technology and leadership experience from Motorola, ARRIS, Bell Labs (AT&T, Bellcore, Telcordia, Lucent, Alcatel-Lucent), Cisco, Google, IBM, IITRI (now Alion), ITW, NCR, Nokia, S&C Electric, independent consulting firms, and Illinois Institute of Technology. Together, the organization has over 1000 years of high technology management and technical leadership experience with a strong wireless, software, and telecommunications focus. Roberson and Associates members have contributed to 3GPP standards, and FCC, TIA, ATIS, and APCO initiatives focusing on public safety communications and the national public safety broadband network. In addition, individuals in the organization have nearly 250 issued patents and many more pending, as well as numerous publications, reports, articles, and test results related to public safety, policy, and spectrum. Freedom Technologies, Inc. (FTI)

FTI, headquartered in Arlington, Virginia, represents deep, long-standing experience promoting the public safety broadband network, radio spectrum and telecommunications/IT, and public policy development. Established in 1992, FTI and its seasoned team of policy, technical, and legal experts have provided strategic, regulatory, and transactional advice to a diverse client base on issues involving radio spectrum, spectrum auctions, telecommunications, the internet, and mobile technology broadband trends. Our combination of seasoned public affairs professionals, who can support media/public affairs campaigns with in-depth knowledge of communications technology and public policy, is unique. The firm's founder and CEO/President, Janice Obuchowski, served as the Administrator of the National Telecommunications and Information Administration (NTIA) during the Administration of President George H.W. Bush and was Frontline Wireless Chairman of the Board. Frontline Wireless championed the broadband public-private partnership that became our national approach. The FTI team can provide multi-disciplinary support, including policy, regulatory, legal, technical and public affairs expertise for evaluation of AT&T's plan and any alternatives. FTI maintains a strong contact network with the public safety, federal government, and the financial community that it can leverage to offer a range of operational and policy analysis capabilities in performing its evaluation activities.
